HIGH QUALITY EUROPEAN PRODUCTION 21ST CENTURY GREEN TECHNOLOGY

Since the company was founded in 2003, more and more people are choosing Wellis products, not only in our home country, but throughout in Europe. With the pursuit for a healthy lifestyle, the demand for quality wellness products is on the rise.

Thanks to continuous growth and development, Wellis Magyarország Zrt. is now the largest spa manufacturer in Europe. As a domestic producer, it is the market leader amongst the wellness equipment manufacturers and distributors of Hungary. Production of pools and spas happen in two separate departments, in an area of altogether 18.000 square meters (approximately 190.000 square feet), with the involvement of 400 people. Owing to the significant growth in capacity, every year 20.000 families can enjoy wellness experiences provided by Hungarian-made spas and sanitaryware! Every developing company's history has major milestones. For Wellis, the latest of these came only a few months ago: in December 2015 we opened a 10.000 square meters (approximately 110.000 square feet) large production hall. The building of the complex equipped with enormous, cutting edge manufacturing tools was motivated by the rising demand of the market and the pursuit of quality manufacturing technology.

EVERY YEAR MORE THAN 20 EXPOS WORLDWIDE

Wellis is working with more than 300 international partners and a wide-spread domestic partner network, runs a manufacturing and logistic center that now takes up a 27.500 square meters (approximately 300.000 square feet) area.

At our manufacturing plant of 10.000 square meters (approximately 110.000 square feet) completed in December 2015, we began manufacturing not only spas, but swim spas as well. Halfway through 2016 we finished building our 5.000 square meters (approximately 55.000 square feet) large warehouse.

There is no better proof of the international recognition Wellis receives than recognitions awarded to our products at numerous international expos. These show the results of excellent quality and more than 10 years worth of professional experience. More than 500 sales points worldwide, 9000 spas produced every year.

WELLIS SPA FEATURES

AROMATIC THERAPY

The benefits of inhaling the aroma of distilled essential oils has been known about for many centuries. When combined with the Wellis hydro massage system the aromatic scents can enhance your mood, and aid deep relaxation.

_____ for more details of the product, please go to page 153

AQUASOUL SOUND SYSTEM

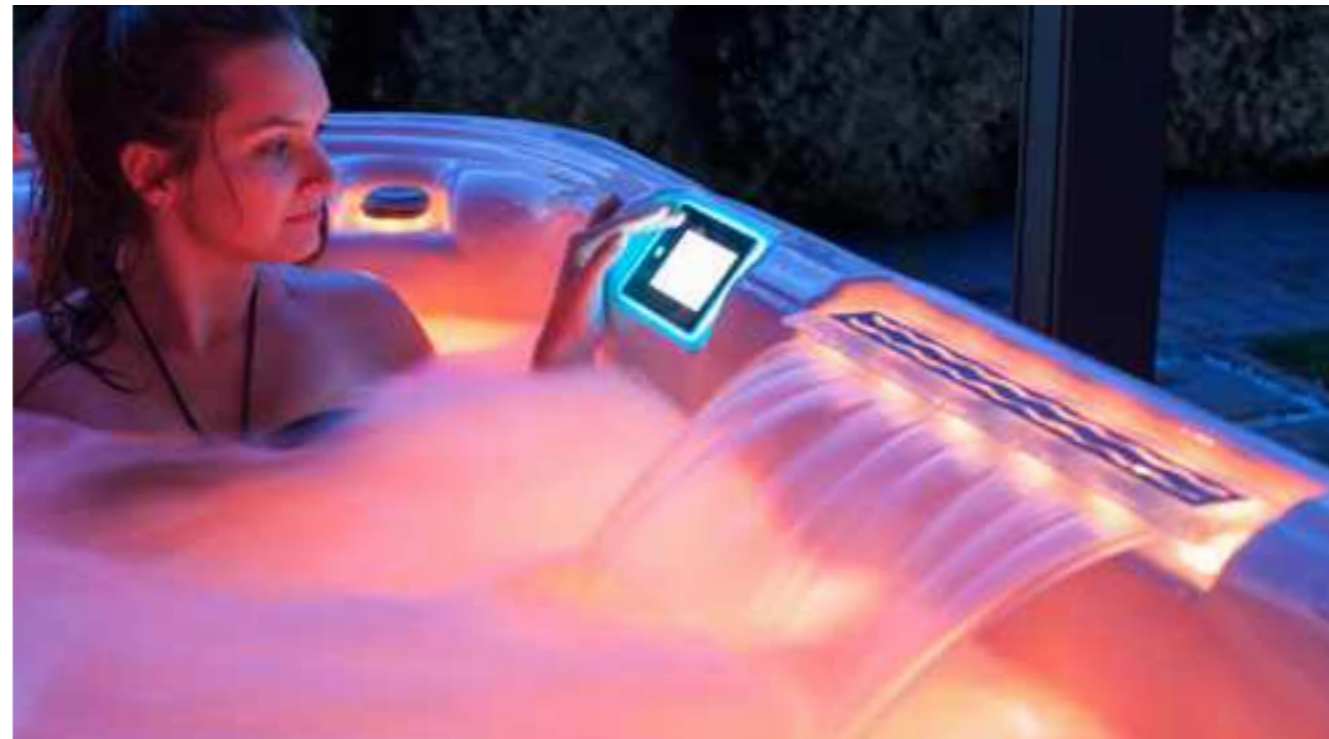

The Wellis AquaSoul™ Pro sound system features the newly developed, top quality waterproof elements. You no longer need to bother with CDs, MP3 players or any other cable connected devices because the built-in receiver is true WiFi and Bluetooth so its even connectable via your mobile phone.

_____ for more details of the product, please go to page 153

WELLIS MASSAGE

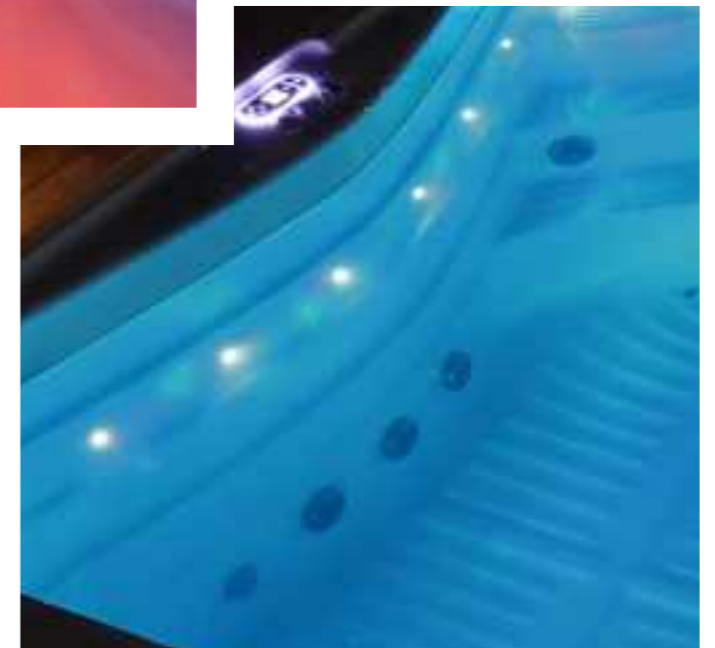

We work with office seating experts and therapists from several fields to arrive at the optimal shape for our spa seats. The result is a range of hydrotherapy stations that fit a wide range of physiques, provide highly effective hydro massage to all the right places, and are exceptionally pleasant and comfortable places to sit or lay.

COLOUR THERAPY MOOD LIGHTING

The application of this knowledge is now known as chromotherapy and is widely used for helping with relaxation, destressing and mood enhancement. In our Spas we call this mood lighting. Our chromotherapy system is based upon lights of four different colours: green, yellow, blue and red.

_____ for more details of the product, please go to page 153

WELLIS SMARTPHONE APPLICATION

Control your spa from home or while you are on the road with the Wellis SMARTPHONE™ app! Available for both iPhone and Android smartphones. Set the desired temperature and other functions from your phone, before you head over to holiday house, so that by the time you arrive you will have a heated, ready-to-use spa waiting for you, providing you all the benefits and positive effects of a Wellis hydromassage.

_____ for more details of the product, please go to page 153

OXYGEN THERAPY™

Microbubbles are able to enter the skin's pores, removing impurities, carrying oxygen for improved metabolism, lightly caressing skin for exfoliation, and improving hydration for dry skin. Tiny bubbles remain suspended then collapse in the water, keeping heat in the spa and around the body. More effectively drawing in moisture, improving circulation, opening pores to release toxins, and increasing cardiovascular activity.

_____ for more details of the product, please go to page 153

PULSAR™ MASSAGE SYSTEM

The jets will pulse on and off to send the massage up and down your body. This pulsating movement brings many of the benefits of hand massage in assisting circulation and the flushing of toxins from the body – apart from just being wonderfully relaxing too!

_____ for more details of the product, please go to page 153

VARIO PODS

Very similar to the effect from a massage chair, these pods are not water jets but moving massage pods that provide a physical shiatsu type massage to the deeper tissues of the back. Several massage programs and intensities can be easily selected from a convenient touch panel and controlled independently from the hydro jets.

_____ for more details of the product, please go to page 153

Wellis crystal

All Wellis spas use a multi-stage filtration and sanitation system that ensures crystal clear, safe bathing water with the minimum of user input.

Our antimicrobial spa filter cartridges are designed to provide an unsurpassed level of leisure water cleansing

_____ for more details of the product, please go to page 152

UV-C WATER SANITIZATION

The Wellis UV-C water sanitization brings the latest advances in UV-C water treatment technology to domestic Spas.

UV-C has long been a preferred system of sanitizing water in commercial swimming pools. This water treatment is hypo-allergenic and practicably 100% effective in destroying bacteria, viruses and water bourn contaminates.

_____ for more details of the product, please go to page 152

WELLIS IN.CLEAR SYSTEM

In.clear generates and releases bromine into the spa water, rapidly destroying any microbiological contaminants such as waterborne bacteria, algae, and organic matter given off by spa bathers.

_____ for more details of the product, please go to page 152

WELLIS CRYSTAL WATER TREATMENT

Wellis Crystal is an environmentally friendly water care system, that can be used in your spa or hot tub. Wellis Crystal will help you to keep the water in your spa clean in a safe, simple and effective way. With only one weekly treatment Wellis Crystal will help you to prevent calcium deposits in your system.

CITYLINE INNOVATIONS

WE HAVE FACELIFTED OUR CITYLINE SPA MODELS TO MAKE THEM MORE STYLISH

1. NEW HEADRESTS

Advanced ergonomics, more comfortable design.

2. NEW SHOULDER MASSAGE

Takes your daily stress off your shoulder and neck.

3. NEW LIGHTING FOUNTAIN JETS

Triple fountain jets triple the fun and design in your spa.

4. NEW AUDIO SYSTEM

Improved bluetooth signal range, stylish looking speakers, with new subwoofer (300 watts).

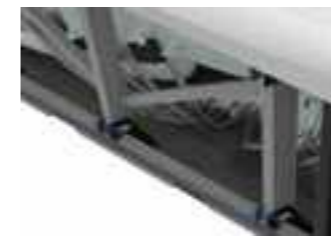

5. NEW JETS

Enter the future with the new Wellis jet designs.

6. NEW CABINET CORNERS

New design, more precise and easier fitting, thanks to the new technology.

7. NEW CONSOLES

Durable injection moulded consoles are easy to assemble, and give extra support.

8. NEW SPA FLOOR PAN

With enhanced vacuum moulding method, spa floor pans became stronger and easier to move with the moulded handholds.

NEW IN.TOUCH 2 APP

Standard in all CityLine models. Our service engineers have remote access to your spa, so not only the user can control the spa.

UV-C WATER SANITIZER

Disinfects water efficiently and safely. Standard in all CityLine models.

DANUBE POWER / DANUBE TURBINE
4000 x 2300 x 1500 mm
one-person swimming pool

The most important feature of all our swim spas is their dimensions. All of them is 150cm deep and 230cm wide. This huge inner space allows the swimmer to have a perfect training experience. The Danube swim spa is a 4 m long exercise pool. Danube Power's 3 river jets gives you the perfect counterflow to exercise freely in the spa. Its maximum pump strength is 6 horsepower, which allows for perfect movement strength. Danube Turbine has a counter-current W-Power turbine, that capable of moving 150-160 cubic meters of water per hour (4 adjustable positions), with 75% lower power consumption (7 Ampers only), and twice the water yield in comparison with swim spa engines. Incredible performance is combined with energy efficiency - it can even be operated on single-phase electric power.

AQUABIKE

The Aquabike is recommended to those who seek a general fitness training, need exercises for rehabilitation, or simply enjoy cycling.

3 RIVER JETS

15 HP maximum performance, 3 jets countercurrent system, one Viper swim spa pump for each river jet

TRAINING AND ROWING SET

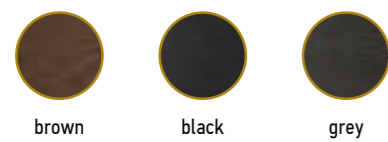

The expander combined with paddles offers the experience of real rowing. At the same time, the expander alone can be used for a number of different fitness trainings

SWIMMING STICK
The secret of dynamic swimming training

- 4000 x 2300 x 1500 mm
- 3 hydromassage pumps
- 3 river jets
- UV-C water sanitization
- 21 pcs LED lighting

AMAZONAS POWER / AMAZONAS TURBINE

5460 x 2300 x 1500 mm

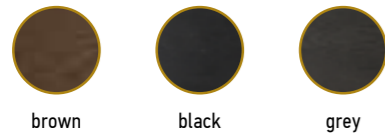

one-person swimming pool, 3 sitting places

Spa and swimming pool in one! It can be a relaxing time with the family or workout, relaxing swimming, the Amazonas swim spa provides opportunity for all of them. With its 5,46 meters of length, besides its purpose of a swimming pool, it contributes to the perfect freshening wellness experience with a massage section for 3 people. With the easy access to the swimming area, we can easily change between the pampering wellness and the sport activity that moves the whole body. The W-Power Turbine - instead of the 3 hydromassage pumps- is capable to spin 50-160 m³ water per hour. In contrast to standard swim spa pumps Amazonas turbine produces by 75% less power consumption while delivering twice the amount of water.

5460 x 2300 x 1500 mm
 4 hydromassage pumps
 36 jets + 3 river jets
 UV-C water sanitization
 25 pcs LED lighting

RIO GRANDE / RIO GRANDE TURBINE

5870 x 2300 x 1500 mm

one-person swimming pool, 1 reclining place, 3 sitting places

Freshening swimming and relaxing, exciting experience of a hot tub in a swimming pool! The Rio Grande swim spa provides combined experience for its users. Thanks to the unique solutions of the counter current system, it serves as a swimming pool, and after the exhausting swimming you can relax in the massage section with 3 seats and one reclining place. The W-Power Turbine - instead of the 3 hydromassage pumps - is capable to spin 50-160 m³ water per hour. In contrast to standard swim spa pumps Rio Grande's turbine produces by 75% less power consumption while delivering twice the amount of water.

W-POWER TURBINE
Experience the endless swimming with this powerful counterflow engine

CAPTAIN SEAT
Back massage on advanced level. With the adjustable direction and strength of the jets everyone can customize this massage place, which was developed especially for back massage.

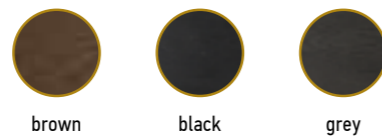

CLASSIC SEAT
The 6 point back massage affords a standard proven back muscle massage

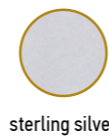

SMARTTOUCH CONTROL PANEL
Our touch screen keypad is fun to use, simple to learn and features an intuitive and engaging one level menu interface.

MINIMAL HEAT LOSS IN ALL WEATHER CONDITIONS

The Wellis spa earned excellent results on the heatmap test. The temperature of the water in the spa visible in the picture is 35 °C, while that of the outer covering and the thermal cover is merely 4 °C. The outdoor temperature is -5 °C.

QUALITY ASSURANCE

Our quality is continuously benchmarked against the highest German production Standards under the TÜV certification protocol that we subscribe to. This ensures we constantly meet and exceed all relevant International quality standards.

We are proud of this commitment to excellence and the clear differentiation from our market competitors that it affords us. Our TÜV certificate guarantees that our products are of excellent quality, and are regularly and independently monitored to meet and exceed the highest manufacturing standards. The CE label on all our products reassures our customers that the design and build meets or exceeds all relevant EU standards.

PRODUCT WARRANTY

- **10 years warranty on the Shell structure of the spa**
- **7 years warranty on the Shell surface of the spa**
- **3 years warranty on the Cabinet of the spa**
- **3 years on the control box and the display module**

For more details about product warranty please contact your dealer.

ENERGY CONSUMPTION TEST

Consumption of hot tubs with 2 pumps - Hot tubs produced by Wellis are designed to provide luxury and comfort in addition to maintenance costs so you don't have to worry just enjoy the benefits of your Wellis hot tub and relax.

PRODUCT WARRANTY

10 years warranty on the Shell structure of the SPA

The manufacturer extends to the user of the SPA a 10 years warranty that the shell will maintain its structural integrity and configuration and be free of water loss due to a defect in the SPA shell.

7 years warranty on the Shell surface of the SPA

The manufacturer provides to the user of the SPA a 7 years warranty against blistering, cracking, or delamination of the SPA's shell

3 years warranty on the Cabinet of the SPA

The manufacturer warrants the SPAs cabinet to be free from defects in material for 3 years. This warranty specifically covers peeling, cracking or shrinking. Fading and weathering of the surface will occur naturally over time, and are not considered to be warrantable defects.

3 years no leak plumbing warranty

SPA fittings, internal plumbing lines and the jet assemblies are warranted against leaking due to defects in materials or workmanship.

3 years on the control box and the display module

The manufacturer warrants the display and the SPA control box (heating included) against defects in materials and workmanship or any defect for three years. According to the electrical components this warranty is not given on fuses, bulbs and gaskets.

2 years on the standard and optional SPA components

The manufacturer warrants the pumps, motors, jets, air regulators, valves, diverters, valves and other spa components against defects in materials and workmanship for two years. Some parts, most of which can be changed out without the use of tools, such as filter cartridges, filter lid, spa pillows and cover locks, are not included in this warranty, but are warranted to be free from defects in materials and workmanship at the time of delivery.

2 years on the Thermo cover of the SPA

The manufacturer provides to the user of the SPA a 2 years warranty against any failure due to defects in materials or workmanship. Fading and weathering of the surface will occur naturally over time, and are not considered to be warrantable defects.

2 years warranty on the Pulsar hydrotherapy system

The factory installed Pulsar hydrotherapy system is warranted against defects in materials or workmanship for 2 years.

2 years warranty on the ozone generator

The ozone generator is warranted against defects in materials or workmanship for 2 years from the original date of delivery.

2 years warranty on the in.clear antiseptic system

The factory installed in.clear antiseptic system is warranted against defects in materials or workmanship for 2 years.

2 years warranty on the audio system components

The factory installed audio components (i.e. power supply, speakers, wires, etc.) are warranted against defects in materials or workmanship for 2 years.

2 years warranty on the LED lights

The factory installed LED lights are warranted against defects in materials or workmanship for 2 years

2 years warranty on the UV-C disinfection system

The factory installed UV-C disinfection system is warranted against defects in materials or workmanship for 2 years. This warranty is not given on the bulb of the UV-C system.

1 year warranty on the UV-C bulb

The natural lifetime for an UV-C bulb is around 5000 hours, but it depends on the usage method of it. The manufacturer provides a 1 year warranty on the UV-C bulb.

EXTENT OF WARRANTY

This warranty extends only to the original consumer purchaser of the SPA when invoiced and delivered. This warranty begins from the compilation date of the factory invoice of the SPA. This warranty terminates upon any transfer of ownership, prior to the expiration of the warranty period.

LIMITATIONS

This warranty does not cover damage caused by misuse, lack of maintenance, or limescale deposits.

The manufacturer reserves the right to replace the defective parts with factory or remanufactured parts.

The manufacturer is not responsible for any damage caused by alterations or modifications by the user.

Radio reception is not covered by warranty because the reception depends on local conditions. The received signal may deteriorate if there are high-voltage lines near the spa.

The manufacturer provides 1 year general warranty for each spare part for the SPA.

The warranty of the SPA does not cover defects, damage, or failure caused by the common carrier, installer, user, or other persons, pets, or rodents, or resulting from, without limitation, any of the following: careless handling (lifting unit by plumbing, abrading finish, etc.) including its own negligence; modification of any type for any reason (including modification to meet local codes); improper installation (including installation not in accordance with instructions and specifications provided with the unit); connections supplied by the installer of the equipment;

improper voltage supply or unauthorized electrical modification; misuse; incorrect operation, or lack of proper routine maintenance; operation of the unit without specified minimum amount of water or at inappropriate water temperature; use of abrasive or improper cleaners; or acts of God, such as lightning, floods, earthquakes, etc.

In addition, The manufacturer will not be responsible for incidental or consequential damages or losses arising from any cause (e.g., water damage to carpet, ceiling, tiles, marble, loss of use, etc.) including its own negligence; damages to, respecting, or resulting from: plated parts when pool and/or spa chemicals are used in the unit or hard water conditions; optional bath equipment not manufactured by the Company but supplied by Dealer, installer or the Company; the unit's prior usage as an operational display; or defects that should have been discovered before installation.

This warranty does not include: labor, transportation, or other costs incurred in the removal and/or reinstallation of the original unit and/or installation of a replacement unit; any costs relating to obtaining access for repair; or loss of use damage, including loss of sales, profit or business advantage of any kind under any circumstances. SPA units are excluded from any warranty coverage if any addition, deletion, or modification of any kind whatsoever has been made to the unit (or to any component).

This warranty does not cover defects or damage due to normal wear and tear, improper installation, alteration without the manufacturer written consent, accident, misuse, abuse, commercial or industrial use, use of an accessory not approved by the manufacturer, failure to follow the user's manual, or repairs made or attempted by anyone other than an authorized representative of the manufacturer.

WARRANTY PERFORMANCE

To make a claim under this warranty, contact your dealer. In the event you are unable to obtain service from the dealer, please contact the manufacturer.

W-EC PUMP

(Wellis Energy-efficient circulation pump) We build the new W-EC pump as a standard equipment into most of our spas. While an average energy-efficient water circulation pump moves 100-150L of water per minute, the new Wellis W-EC water circulation pump moves 300L of water per minute with only 0,8 A of power requirement.

HYDRO MASSAGE PUMPS

Each spa pump is carefully optimised to provide maximum power and efficiency for the number, size and function of the jets it serves. Therefore we use several sizes and configurations of pumps across the different spa models that we produce.

PLUG & PLAY

The simplest way for installing a spa. Fill up and use your spas as soon as you plug it in a socket, and test it with the Circuit breaker plug (RCD). Simply plug the Circuit breaker plug into a mains socket, test and reset the circuit using the clearly marked buttons and then use your spa with the user protected from the risk of electric shock.

Features:

- For outdoor use: IP54
- Two pole switch-off
- Rated voltage: 230V
- Rated current: 16A
- Nominal differential current: 30 mA

POLYFOAM INSULATION WITH HEAT-MIRROR FOIL

All the internal surfaces of the cabinet and floor pan are completely covered in our heat mirror insulated foil. This not only stops precious heat energy from escaping, but actually reflects the waste heat from the pump motors back into the plumbing. This "free" heat energy is therefore transferred back into the spa water, significantly reducing running costs. We call this dynamic reflective barrier insulation.

WPS (WELLIS POLYSTYROL)

Cabinet frame Immortality for the spa cabinet's frame! The special polymer ensures exceptional stability and life for the Spa's structural frame – protecting and extending the life of your investment even further.

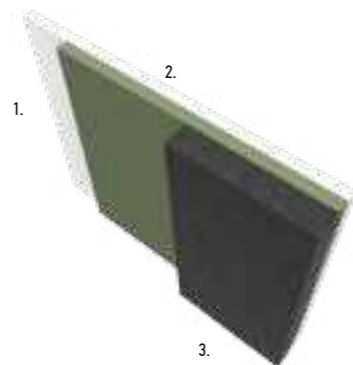

POLI-MAX™ REINFORCEMENT

Our spa's shell is a technological triumph, we have developed an entirely eco-neutral Acrylic/Abs/Polymer laminate system that results in a stronger, lighter, more stable, eco friendly and ultimately bio degradable product. It even self insulates for both heat and sound, significantly lowering running costs as well as making our spas probably the quietest as well as safest for your family you can buy.

SOME BENEFITS OF POLI-MAX™ REINFORCED SPA BODY

- Highly effective sound insulation, probably the quietest Spas available – take a spa whenever it pleases you and it won't annoy the neighbours!
- Highly effective heat insulation – which means a longer time between heating intervals - reduced electricity costs!
- Ecologically sound product, easily degradable, (unlike fibreglass it does not give off any hazardous styrol gas). Thus it is not classes as hazardous and meets all relevant EU standards.

1. Acrylic outer surface with antimicrobial treatment.
2. ABS polymer layer to further increase impact resistance and strength.
3. Medium density robotically applied polyurethane for added strength plus acustic and thermal insulation. The cushioned no-stress support pads are embedded into this layer.

REINFORCED MOLDED ABS FLOOR PAN

The insulated one piece molded floor pan forms the foundation upon which we build our spas. The pan sides extend upwards and form a, moisture and insect proof barrier to protect the spas structure from the detrimental effects of damp ground. Our reflective barrier insulation system extends across the floor pan to prevent valuable waste heat being drawn through the base by the "cold sink effect" that is created by damp ground.

SCANDINAVIAN INSULATION/OPTION

For extreme climates we offer the option of our "Scandinavian" insulation. This has a much higher insulation rating with triple layer Polyfoam panels and additional under spa rim and floor pan insulation. Only recommended for extreme sub zero temperatures and not for more temperate climates.

1. Poliurethane spa rim insulation.
2. 3,5 cm thick polyfoam insulation between spa cabinet and floor pan
3. 3,5 cm thick polyfoam spa cabinet insulationthe spa and cabinet.

HOT TUB INSULATION & STRUCTURE

Effective insulation is extremely important for hot tubs in order to reduce running costs to a minimum. The triple "Reflective Thermal Barrier" (RTB) insulation of WELLIS spas utilizes thermal gains from the spa's equipment, collecting any waste heat energy and reflecting it back into the plumbing and shell, whilst keeping out the colder outer air.

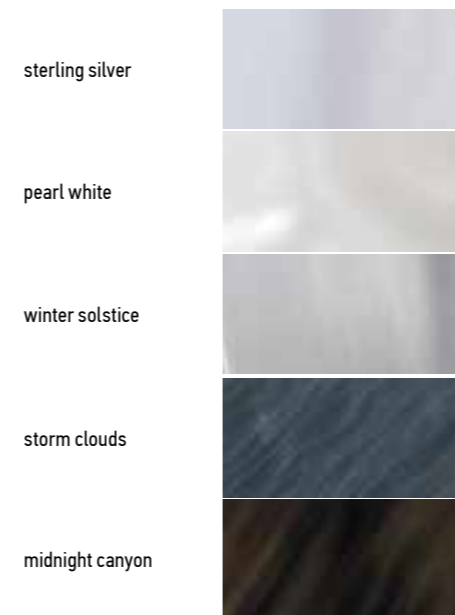

We've even built our RTB system into our Thermal Spa covers which also have a special reflective foil coating beneath them to bounce rising heat back into the spa water. This integrated energy management system means Wellis Spas are exceptionally economical to own.

Many spa manufacturers still use discredited spray foam insulation whilst, a few still mount the spa equipment, actually outside the spa cabinet, beneath the steps. These old legacy systems are both outdated as well as expensive to run and damaging to our environment.

The spa heatmap picture is an infrared image of a Wellis spa which shows the efficiency of the RTB system. The persons face is red, indicating a high heat loss, whilst the pastel green and blues of the Wellis spa indicate a very low heat loss as almost all the heat is kept inside the spa and cabinet.

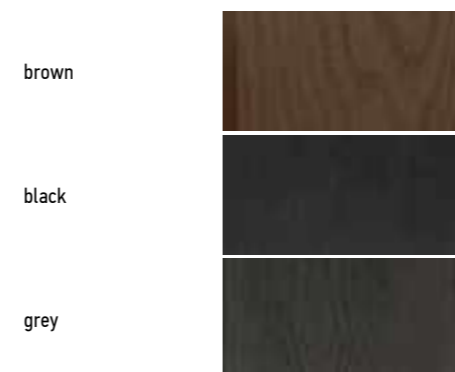

ACRILYC COLOURS

We have a comprehensive range of 6 beautiful contemporary shades acrylic for our spas that will harmonise with any setting – indoor or out.

CABINET COLOURS

No more sanding, oiling and messy maintenance of a traditional timber cabinet. Our spa cabinets are made of a UV resistant polymer material that looks as good as real wood but is entirely maintenance free. The contemporary colours suit both interior and garden settings. The new StarSide™ cabinet is a new investment in 2017. It is produced of horizontal side, wood-textured elements and vacuum-formed ABS plastic corner pieces. The built-in RGB LED light works in conjunction with mood lighting inside the pool. Available in black, gray and brown colors. CityLine spas also got new side cover. The horizontal sidecovers are paired with vertical corner elements, giving elegance to the standard models. Available in black, grey and brown colors.

WELLIS SMART TOUCH CONTROL PANEL

Introducing our new full featured keypad with color capacitive touch screen display. Parting ways with physical buttons, keys and overlays, our touch screen keypad is fun to use, simple to learn and features an intuitive and engaging one level menu interface.

- Easy Wheel selection menu: the easiest way to set up your spa. To select a mode (sanitization, audio, color, spa, settings), slide the left wheel up or down until the desired icon menu is highlighted in the middle.
- Notification icons: Notification icons at the top right-hand side of the screen show the status of connected value-added accessories (audio system, wifi, in.clear system...).
- Wifi: connect your system to the Internet with Wifi connection to be able to handle your spa settings far away from your home. In the same time Wifi makes it easy not only to handle your spa but to listen to your favourite music during a bath.
- Water sanitization: the water care page will help you set up your ideal filtration and heating settings. Choose, set or modify one of the 5 suggested modes depending on your needs at any given time.

WELLIS EASY4 CONTROL PANEL

The Wellis Easy4 brings all the features you really need to one keypad. Compact, with a big LCD screen; bright enough to be seen throughout the day; simple enough to use in the middle of the night; affordable, yet solidly built..

- Compact full-function keypad: All settings and spa function icons available at a glance to set your spa in the blink of an eye.
- Bright LCD screen: Bright and large, the LCD screen allows an easy setting of the temperature, winter modes and other functions.
- Affordable: Everything you need in one back to basics solution.

AUXILIARY CONTROL PANELS

The 4 button panel is an auxiliary keypad designed to be installed as a second keypad on your spa. It allows you to run the accessories while staying comfortably seated in your spa. Its surface mount allows for an easy installations in different locations around your spa. It can be used to control two massage motors, whirlpool and mood lighting. The one single button is also an auxiliary keypad designed to be installed as a second keypad on your spa. It allows you to activate the spa pump associated to its respective section.

For commercial applications where the spa is to be used by the public, it is often preferable to restrict the functionality of the touch panels to just the operation of the bathing controls (pumps, air bubbler, lighting) and lock out the

programming functionality of filter cycles, temperature etc. Therefore we can site the master control panel in a secure out of sight location and fit simple auxiliary panels for bather use. These can either be single buttons or a four button panel, or a combination of both.

WELLIS JETS

We use different sizes of hydro massage therapy jet with a number of different nozzle configurations. This provides for a varied massage experience from light and fast pulsating through to a slower deeper needling effect. All the jets are individually adjustable for flow, and some can be tailored for speed and treatment area too.

In addition our huge MagmaJET™ provides sufficient power to actually float on, whilst at the other extreme our heated air jets gently caress and rejuvenate.

- **Riverjet 340L/min** - Enjoy the experience of endless swimming in our new swim spa models! The river jets, equipped into swim spas are and the strength of the flow is adjustable, which allows you to control the intensity of the workout.
- **Typhoon 5" - 3" - 2"** - The direction of the Wellis Typhoon jets, to achieve a targeted massage experience, are adjustable one-by-one, they can be opened or closed.
- **Twister 5" - 3"** - Thanks to the Twister jets' adjustable flow the interface of the massage can be customized. All you have to do it to pre-set the jets' flowing radius. It gives you a real exciting, enjoyable massage experience.
- **Monsoon 5"** - Our seven-hole jet provides a circular massage experience. It massages seven points in a row, making the relaxation experience even refreshing.
- **Tsunami 7"** - This sweeping jet provides a very powerful hydro massage experience. Using it in a short intervall brings the expected results.
- **Airjet 3"** - Focusing on sensitive areas. Even massage provides relief to sensitive areas. It always offers you the maximum comfort.

WELLIS CRYSTAL

All Wellis spas use a multi-stage filtration and sanitation system that ensures crystal clear, safe bathing water with the minimum of user input.

The process starts with our special antimicrobial cartridge filters. The low energy eco-circulation pump draws spa water through these filters where any tiny particles are trapped. The antimicrobial coating then helps to destroy any bacteria that may be attached to the filtered particles, preventing growth and smells and ensuring the filters are easily cleaned and returned to service many times over.

Once the spa water has been filtered it passes through the heater and then the eco-circulation pump. Next it is passed through one of three different sanitation devices that we fit. Although a spas bathing water can be kept safe by chemicals alone, an electronic sanitation device will greatly reduce the amount of these chemicals that are required, and hence improve the quality of the water for bathers. Every spa we make is fitted with one of these devices: an ozonator, our UV-C system, or our In.clear digital bromine generator.

Our filters ensure the purification of the water several times a day, leaving no dirt on the floor.

Our antimicrobial spa filter cartridges are designed to provide an unsurpassed level of leisure water cleansing.

Wellis filter quality:

- Diameter: 5 5/8"
- Length: 6 13/16"
- Material area: 3 m²
- Material weight: 102g/m²

WELLIS CRYSTAL WATER TREATMENT

Wellis Crystal is an environmentally friendly water care system, that can be used in your spa or hot tub. Wellis Crystal will help you to keep the water in your spa clean in a safe, simple and effective way. With only one weekly treatment Wellis Crystal will help you to prevent calcium deposits in your system. Moreover, Wellis Crystal will loosen and remove the existing calcium deposits. These calcium deposits are the medium where bacteria and other micro-organisms grow. The UV-system already in your spa, will do the rest. It will destroy the bacteria and disinfect the water.

With extraordinary results: the water in your spa is not only clean, but also looks crystal clear and feels nice and soft.

Contains:

- 2 bottles of Wellis Watertreatment (1 l each)
- 18 pcs chlorine tablets
- 1 measuring cup 200 ml
- 1 microfibre cleaning cloth
- User guide

WELLIS UV-C

The Wellis UV-C water sanitization brings the latest advances in UV-C water treatment technology to domestic Spas. UV-C has long been a preferred system of sanitizing water in commercial swimming pools. This water treatment is hypo-allergenic and practicably 100% effective in destroying bacteria, viruses and water bourn contaminants. Unfortunately the swimming pool equipment is large and heavy and impractical for use in domestic portable spas. Until now. Our exclusive Wellis UV-C water sanitization is light, compact and very powerful. Using just a tiny amount of power, it will silently, safely, and automatically treat the entire spa bathing water, many times each day, ensuring crystal clear, natural quality bathing water for you and your family, whilst minimizing the use of additional sanitizers.

Advantages:

- Ensures fresh, clean and clear water
- Disinfects water efficiently and safely
- Bound chlorine is broken down by UV-C light
- Protects your water from germs
- Can reduce the use of chorine and other chemicals by up to 80%
- Prevents the smell of chlorine and avoids irritation of the skin and eyes (red eyes)
- The lamp has a UV-C output of 11 Watt
- Simple maintenance

FILTER CLEANER GRANULATE/OPTION

For crystal clear jacuzzi water, clean your pool's filter once a week with Wellis Crystal Filter Cleaner.

SPA CLEANER/OPTION

Spa Cleaner has been specifically designed for cleaning your pipes and your spa pool. It frees your spa pool's lines from lime scale and contaminant residues. Use Spa Cleaner whenever you change the water. We recommend replacing the water in your pool quarterly.

Spa Cleaner Is eco-frendly and bio-degradable.

SPA FILTER CLEANING SYSTEM/OPTION

Our new spa filter cleaning system is a unique patented filter cleaning system, designed to clean whirlpool and hot tub filters to perfection in just a flash.

It works solely on the basis of water power and doesn't use chemicals which makes it very environmentally-friendly. It also consumes about 80% less water than other cleaning methods which doesn't just save you a lot of water and the cost of new filters, but also helps avoid getting your hands dirty! You insert the filter to be cleaned into the appliance, connect it to a tap and turn the tap on. The filter will be perfectly clean within just one minute making it spotless again for more hygienic bathing fun!

WELLIS IN.CLEAR SYSTEM

Easy to use and built to last, the in.clear is one of the most efficient water sanitation systems offered to the spa and hot tub industry today. In.clear generates and releases bromine into the spa water, rapidly destroying any microbiological contaminants such as waterborne bacteria, algae, and organic matter given off by spa bathers.

The in.clear system eliminates the need to add products to your spa on a regular basis. The in.clear system does not produce any offensive odors, it does not cause eye or skin irritation and it is easy to use, making it the best choice for hot tub sanitization. Spas using the in.clear system need very little maintenance, and in.clear can be easily installed on new or existing spas.

- **Maintenance** - After the simple start-up procedure is done, you are ready to enjoy your in.clear. Fill your spa with water, add the convenient BromiCharge™ and the in.clear takes care of producing bromine sanitizer. Adjustments to the bromine level are made right at the keypad.
- **No more confusion about chemicals!** - You don't need to wonder what chemicals to add — once installed, the in.clear generates the proper amount of bromine for your spa. And since bromine is more efficient at a wider range of pH levels and at much higher temperatures than chlorine, your spa will be crystal clear and ready to use, without any other products.
- **Away for a while?** - With the in.clear, even if your schedule takes you away from your hot tub for weeks, you'll still enjoy a clean and clear spa when you return. While you're away the system will continue to generate the perfect amount of bromine, based on the setting you select.
- **No more chlorine odor!** - The in.clear produces bromine, so there's never the harsh scent of chlorine to deal with.

AROMATIC THERAPY

The benefits of inhaling the aroma of distilled essential oils has been known about for many centuries. When combined with the Wellis hydro massage system the aromatic scents can enhance your mood, and aid deep relaxation. Smells are one of our most evocative senses, triggering memories and changing perceptions.

With a more simple solution we will make it easier to enhance the experience. With this push-button system air motor is not required to distribute the fragrance, thus this option is now available not only for high-end models. Choose from 6 essential oils: Orange flower, Lavender, Mediterranean, Polynesie, Rosemary, Eucalyptus

COLOUR THERAPY MOOD LIGHTING

Recently much scientific research has been carried out to identify particular beneficial effects of each part of the colour spectrum. The application of this knowledge is now known as chromotherapy and is widely used for helping with relaxation, destressing and mood enhancement. In our Spas we call this mood lighting. Our chromotherapy system is based upon lights of four different colours: green, yellow, blue and red. These can be set to fade gently through the spectrum or, by a simple touch of the spa's control panel can be fixed on the single colour most beneficial to your mood.

IN.MIX COLOURTHERAPY MOODLIGHTING

with two zones on smart touch - Each spa pump is carefully optimised to provide maximum power and efficiency for the number, size and function of the jets it serves. Therefore we use several sizes and configurations of pumps across the different spa models that we produce.

WELLIS SMARTPHONE APPLICATION

The Wellis SmartPhone application is a development for our massage spas. Immediate access and remote control. You can access the control system of your Wellis spa any time from anywhere. You can set the water temperature and circulation and you can even check the current status of the spa.

Control your spa from home or while you are on the road with the Wellis SMARTPHONE™ app! Available for both iPhone and Android smartphones. Set the desired temperature and other functions from your phone, before you head over to holiday house, so that by the time you arrive you will have a heated, ready-to-use spa waiting for you, providing you all the benefits and positive effects of a Wellis hydromassage.

AQUASOUL™ PRO SOUND SYSTEM

The Wellis AquaSoul™ Pro sound system features the newly developed, top quality waterproof elements. You no longer need to bother with CDs, MP3 players or any other cable connected devices because the built-in receiver is true WiFi and Bluetooth so its even connectable via your mobile phone.

AquaSoul™ Pro 4.1 Pop-Up

- 4-channel amplifier with a Bluetooth receiver
- FM radio
- Subwoofer (120 W)
- 2 Pop-Up speakers - 50 W each (4 pcs in case of Olympus)
- 2 built-in speakers - 35 W each (not available for the Olympus)

AquaSoul™ Pro 2.1

- 4-channel amplifier with a Bluetooth receiver
- FM radio
- Waterproof controller within the spa cabinet
- Subwoofer (120 W)
- 2 built-in or Pop-Up speakers (35 W each)

PULSAR™ MASSAGE SYSTEM

Enhances the Wellis experience! The Pulsar™ Massage System lets you choose from 6 different massage programs in one of the spas seats or beds.

Simply select the program and speed and the jets will pulse on and off to send the massage up and down your body. This pulsating movement brings many of the benefits of hand massage in assisting circulation and the flushing of toxins from the body – apart from just being wonderfully relaxing too! Hydro massage tailored just for you.

VARIO PODS

A brand new technology from Wellis that brings physical massage into your spa. Imagine the fingers of your very own massage therapist pressing on your back. Very similar to the effect from a massage chair, these pods are not water jets but moving massage pods that provide a physical shiatsu type massage to the deeper tissues of the back. Several massage programs and intensities can be easily selected from a convenient touch panel and controlled independently from the hydro jets.

OXYGEN THERAPY™

- Natural cleansing, exfoliation, and hydration through oxygenrich microbubbles
- Consistent warmth and improved circulation through an enhanced "sauna effect"
- Deeper relaxation and improved serotonin levels
- Oxygenates the spa's water up to 70% more than normal

The dissolving microbubbles in a Wellis equipped spa cause anions to be released at the surface of the water. When anions are released at concentrations above 50,000 ions/cc they are shown to have therapeutic effects of improving serotonin levels. The anions at the surface are released at concentrations in excess of 80,000 ions/cc, resulting in therapeutic effects such as neutralizing free radicals, improved over-all feelings of wellbeing, calm, and deeper sleep.

Advantages of oxygen therapy™

- provides oxygen for improved metabolism of the skin
- removes contamination by penetrating deep into the pores
- increases the hydration of dry skin
- promotes the growth of skin cells
- reduces scars and skin defects
- eliminates eczema symptoms
- smooths out wrinkles and crow's feet

Microbubbles are able to enter the skin's pores, removing impurities, carrying oxygen for improved metabolism, lightly caressing skin for exfoliation, and improving hydration for dry skin. Tiny bubbles remain suspended then collapse in the water, keeping heat in the spa and around the body. More effectively drawing in moisture, improving circulation, opening pores to release toxins, and increasing cardiovascular activity.

WELLISTEP
Maintenance free spa steps, made of UV-resistant plastic with anti-slip rubber treads - the best choice for your Wellis spa.
Size: 707 x 621 x 425 mm

WOODEN SPA STEP
Simple straight forward steps work well with our floor mount handrail to provide easy, safe access in and out of your spa.

SPA WAND
The spa wand manual pool cleaner is a great device for collecting particles from the footwell and seats without needing to drain down the water.

WELLIS SPAZIANO TRAY
The plastic tray has a stainless steel support that can be mounted to the side panel of the spa cabinet and can also be rotated 360 degrees.

WELLIS TOWEL BAR
A useful accessory for any spa on which you can store your towel and clothes without them getting wet or creased. Folds away between uses.

FLOOR MOUNT HANDRAIL
This rail bolts into the ground to form a really secure full length handrail suitable for commercial as well as domestic spas when total access security is required.

WELLIS SPA GRIP
The rust-proof rails have an anti-slip foam rubber grip and can be fixed to the side panel of the spa cabinet to provide convenient and safe access in and out of the spa.

WELLIS SPA UMBRELLA
It can be opened, closed or tilted with ease by a simple hand crank, whilst its height can be adjusted at the push of a button.
Height: 260 cm
Umbrella diameter: 275 cm

SPA FILTER CLEANING SYSTEM
Our new spa filter cleaning system is a unique patented filter cleaning system, designed to clean whirlpool and hot tub filters to perfection in just a flash.

FILTER CLEANER GRANULATE
For crystal clear jacuzzi water, clean your pool's filter once a week with Wellis Crystal Filter Cleaner.

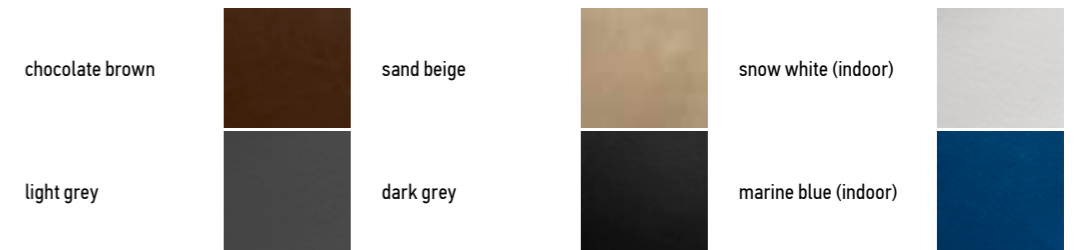

SPA CLEANER
Spa Cleaner has been specifically designed for cleaning your pipes and your spa pool. It frees your spa pool's lines from lime scale and contaminant residues. Use Spa Cleaner whenever you change the water. We recommend replacing the water in your pool quarterly. Spa Cleaner is eco-friendly and bio-degradable.

WELLIS CRYSTAL WATERTREATMENT
(for spas and swim spas) Wellis Crystal is an environmentally friendly water care system, that can be used in your spa or hot tub. Wellis Crystal will help you to keep the water in your spa clean in a safe, simple and effective way.

THERMAL COVER
We manufacture all our own covers to ensure consistent quality and the highest level of thermal insulation effectiveness. This helps to keep our customer's energy costs to a minimum. Our covers include features like a full length hinge buffer seal, internal vapour seal, and a marine grade UV resistant outer cover. The top surface slopes like a house roof so that rain can easily run off.

Available in the following colours:

UNIQUE THERMO COVERS
We can make spa thermo covers for any shape, or any size, in different colours. Please contact your Wellis dealer for more information.

XTREME™ WINTER COVER
The Xtreme™ cover is for extreme winter climates where the temperature is often below zero. Its extra thickness (180mm at the centre) increases its insulation properties as well as adding strength to cope with high snow loads. Not recommended for more temperate climates.

WELLIS SPA BAG
The Wellis Spa Bag provides protection from the weather, so keeping your Wellis spa in great condition between uses, particularly when away on holidays etc.

AQUABIKE
A great fitness and rehabilitation appliance for swim spas. The aquabike is recommended to those who seek a general fitness training, need exercises for rehabilitation, or simply enjoy cycling.

WELLIS EASY LIFTER
Forget struggling with heavy spa covers. Wellis Easy Lifter is here to help you out. This side mounted device requires the smallest free space ever behind the spa, (no more than 40 cm) and is made of top quality materials.

- adjustable width and length for all sizes of spas
- durable, powder coated surface
- black foam antislip grips

EXPANDER
Training and rowing set for swim spas. The expander combined with paddles offers the experience of real rowing. At the same time, the expander alone, fixed to the attachment on the side of the pool, can be used for a number of different fitness trainings.
